CAREER OBJECTIVE

AI/ML Engineering student with a strong foundation in full-stack architecture and algorithmic problem-solving. Focused on developing intelligent retrieval systems and deployable web applications.

EDUCATION

Brainware University

B.Tech in Computer Science Engineering (Artificial Intelligence & Machine Learning) — Currently in 3rd Year | Expected Graduation: July, 2028

PROJECTS

TripGenius – AI-Powered Travel Advisory Platform

- Engineered a full-stack TypeScript and Next.js web application integrating fast AI APIs and PostgreSQL to dynamically process user preferences and autonomously generate personalized itineraries.

Snaptube-Clone – High-Concurrency Media Extraction Engine

- Architected a high-concurrency media extraction system using Go and Python, featuring a studio-grade FFmpeg rendering pipeline with hardware-adaptive scaling and anti-bot mechanics.

Fanmade Windows 12 – Interactive OS Web Simulation

- Built a highly interactive Windows 12 conceptual web simulation using JavaScript and React, featuring dynamic UI state management and an embedded offline AI assistant powered by Ollama.

TECHNICAL SKILLS

- Languages:** Python, Java, C++, Go, Rust, TypeScript, JavaScript, Solidity, HTML, CSS
- Frameworks & Libraries:** React, Flask, Django, LangGraph, Three.js, WebGL
- Databases:** PostgreSQL, Supabase (pgvector)
- DevOps & Tools:** Git, GitHub, Docker Desktop, Vercel, VS Code
- AI Platforms:** Google AI Studio, Ollama (Local LLMs), ChatGPT, Antigravity CLI

CERTIFICATIONS & DOMAINS

- Certification:** Oracle Agentic AI Foundations Associate (1Z0-1157-26).
- Problem Solving:** Active algorithmic problem solver on LeetCode focusing on data structures, arrays, and linked lists.

SOFT SKILLS

Analytical Problem Solving • Adaptability • Continuous Learning • Technical Communication • Collaboration

STRENGTHS

Quick learner with a strong curiosity toward building practical software systems, capable of rapidly adapting to new technical environments, and highly motivated to combine academic AI concepts with applied software engineering.
